

**IMD Dubai 2007
About IMD Dubai 2007**

The **International Medical Care and Diagnostic Conference and Exhibition - IMD - IHF Dubai 2007**, focuses on the following specialized international conferences and exhibitions:

- International Critical Care Conference **ICCC – Dubai 2007** in conjunction with 2nd International Pan Arab Critical Care Medicine Congress – Dubai
- Dubai International Emergency and Catastrophe Management Exhibition – **IECM DUBAI** .
- Dubai International Hospital Management Conference and Exhibition - **Dubai Hospi-manage**
- Dubai International Hospital Architectural Design and Biomedical Conference and Exhibition - **Dubai Hospi-design**

IMD – IHF Dubai 2007 is designed to meet the requirements of medical professionals and manufacturers in the region, by bringing both together under one roof. IMD Dubai does not only target the United Arab Emirates market, it targets all the Arab World, North Africa and Asia, especially with the support of the International Hospital Federation, which chose to base its Middle-East office in Dubai, in order to provide its services to the region, as well as North Africa and Asia.

IMD Dubai is supported by the Government of Dubai, and is held under the patronage of H.H. Sheikh Hamdan Bin Rashid Al Maktoum, Deputy Ruler of Dubai, Minister of Finance & Industry and President of the Department of Health and Medical Services. Moreover, the event is officially supported by the UAE Ministry of Health, Ministry of Interior, Rescue and Ambulance Department, Abu Dhabi and Dubai Police Emergency and Rescue Ambulance Services, as well as many GCC and Arab world hospitals. Internationally, IMD Dubai is supported by Medica - Messe Düsseldorf and 130 countries world-wide, who are members of IHF.

The International Medical Care & Diagnostic Conference and Exhibition - IMD – IHF DUBAI is promoted world-wide, to encourage professionals, dealers, decision-makers and government and private sectors to get together and exchange valuable knowledge. The conference will host 100 speakers from around the globe, who will present the latest technologies and developments in the field of medicine.

According to the official statistics of IMD DUBAI 2005, 1917 Conference Participants have attended the conference only, while the exhibition attracted more than 5000 trade visitors in 3 days. This year, IMD-IHF DUBAI 2007 is expecting to increase the number of participants, Exhibitors and Trade Visitors by 15 to 20%.

IMD Dubai 2007 Messages

Message from the Director General - DOHMS

On behalf of the Department of Health and Medical Services-DOHMS, Government of Dubai, it gives me immense pleasure to invite the medical professionals from both the public and private healthcare industries and all the health and safety professionals to participate in the International Medical Care & Diagnostic Conference & Exhibition, IMD - IHF Dubai 2007 which will be held from 22 – 24 April 2007, at the Dubai International Convention Center. IMD - IHF Dubai 2007 will be held under the patronage of H. H Sheikh Hamdan Bin Rashid Al Maktoum, Deputy Ruler of Dubai, Minister of finance and Industry, President of the Department of Health and Medical Services.

During IMD-IHF Dubai 2007, we are organizing & addressing specialists and professionals who are in the field of Critical Care, Emergency and Hospital Management & Architectural Design. The speakers of this conference are internationally acclaimed and well known in their area of expertise.

I welcome you to this event and offer you the opportunity to join us in this endeavor.

Qadhi Saeed Al Murooshid

Director General
Department of Health & Medical Services,
Dubai – UAE

Message from the President - INDEX Holding

On behalf of my entire team at INDEX Conferences and Exhibitions Organisation Est., and as a representative of the International Hospital Federation (IHF) in the Middle East, I would like to invite all health-care and medical professionals to join us once again and conduct a successful International Medical Care and Diagnostic Conference and Exhibition – IMD – IHF DUBAI 2007.

IMD - IHF DUBAI's specialised medical conferences and exhibitions will be held from 22 – 24 April 2007, at the Dubai International Convention Centre. A series of conferences, focusing on specialised subjects like Hospital Management, Emergency and Catastrophe, Critical Care, Biomedical Engineering and Hospital Architectural Design will be held in conjunction with IMD – IHF DUBAI. A distinguished faculty from the Department of Health and Medical Services - Dubai, Ministry of Health, Dubai Police Rescue & Ambulance Services, Ministry of Interior, and renowned speakers will add an interesting and informative feature to this International conference.

The main theme of IMD – IHF DUBAI 2007 is "Responding to Medical to Medical Challenges", with various sub themes concentrating on improving health by means of accreditation and certification, e-health developments and human resources, which includes immigration and the health of the workforce.

In conjunction with the conference, an exhibition supported by Medica-Messe D_sseldorf will be held in relation to the same subjects mentioned above. With a 4,000-sqm area, exhibitors from countries around the globe will give participants an opportunity to experience the latest medical technologies available.

I extend my warm welcome to all medical experts, to join us and contribute to this specialized International conference in Dubai, UAE.

Abdul Salam Al Madani

President-INDEX Holding
IHF Representative in the Middle-East

Message from the DG - IHF

Due to the great success of the IMD – IHF 2005 Conference and Exhibition, it gives me immense pleasure to welcome you once again to IMD - IHF DUBAI, which will be held from 22 – 24 April 2007. The focus and the motto of the conference is: "Responding to Medical Challenges". We have selected three sub-themes related to this motto. The first one will deal with the improvement of health services through accreditation and certification. In many countries, one is in the process of identifying appropriate approaches to this issue. In other countries, trials are already underway. However, in some, such quality schemes are already well established.

The second sub-theme deals with improving quality through recent e-health developments such as electronic medical records, the communication within and between hospitals, as well as of laboratory, radiology and other diagnostic information. The third sub-theme is focusing on the human resources from two perspectives. One is the migration of health workers. In some countries up to 90% of the health workers are immigrants. Sometimes, it is felt that this is needed to be changed to a larger share of nationals. Another perspective to be dealt with is the health of the health workers. From some countries, it is reported that health workers lack good health, more than the average health of the country where they work and live. The three above sub-themes are dealt with in plenary sessions by international as well as regional speakers. In parallel sessions, the participants of the quality-related topics will be able to submit abstracts for the speaker selection of these sessions. Starting two days ahead, a course specializing in rescue, ambulance and emergency work will be running along with the conference.

Finally, I would like to extend to all of you, a great welcome to IMD –IHF DUBAI 2007.

Prof. Per Gunnar Svensson
Director General
International Hospital Federation

ICCC Dubai 2007 – International Critical Care Conference Conference Chairman's Message

Under the patronage of **H. H. Sheikh Hamdan Bin Rashid Al Maktoum**, Deputy Ruler of Dubai, Minister of Finance & Industry, President of the Department of Health and Medical Services, we are pleased to announce International Critical Care Conference ICCC Dubai - 2007, in conjunction with, 2nd International Pan Arab Critical Care Medicine Congress Dubai - 2007. The event will be held from **22-24 April 2007** at the **International Convention Centre** – Dubai.

On behalf of DOHMS, Index Holding, National & International Scientific Committees, I am delighted to invite and welcome you all for the upcoming "**ICCC-Dubai 2007**". The conference will be part of the International Medical Care & Diagnostic Conference & Exhibition, **IMD - IHF Dubai 2007**.

Methods of Scientific Educational Track (Pedagogy):

- Lectures
- Experts Group
- Discussion Panels (Pro-con debates)
- Poster Presentations

Trophies will be awarded for the best **Poster Presentation**, best **Journal Presentation** for the last 3 years and best **Discussion Panel**. Each category will have 3 winners and the Trophies will reflect the historically pioneer Arab Muslim Scientists Ibn Sinna, Al Razi and Ibn Al Nafees and hence will carry their names.

Coinciding with the conference, an exhibition supported by **Medica-Messe Düsseldorf** will be organized allied with the above mentioned subjects. With an **area of 4,000-sqm**, exhibitors from **countries around the globe** will give participants an opportunity to explore the latest medical technologies & developments available.

Dr Hussain Nasser Al Rahma
Chairman of the ICCC Dubai 2007

ICCC Dubai 2007 – International Critical Care Conference Conference Subject

Subject:

- Sepsis
- Nosocomial Infection
- Shock
- Nutritional Support
- Renal Failure & Replacement
- Respiratory failure & Ventilation
- Critical care in the Emergency room
- Neuro – Trauma Critical care
- Current advances in Cardiology in the I.C.U (cardiogenic shock).
- Role of Clinical Pharmacist in Critical Care

Pre–Conference Courses

Courses:

- Fundamental of Critical Care Support , FCCS
- Fundamentals of Disaster Management , FDM
- Improving Communication Skills
- Mechanical Ventilation
- Transport of Critically ill Patient Course

Workshops:

- Difficult Airway Management
- Hemodynamic Monitoring with Flow Track
- Renal Replacement Therapy
- ICP Procedure & Monitoring
- Percutaneous Tracheostomy
- Percutaneous Gastrostomy

ICCC Dubai 2007 – International Critical Care Conference Conference Topics

Sepsis

- Pathophysiology/ epidemiology of sepsis
- Type of organism and organ dysfunction
- Liver replacement therapy
- On going therapeutic trials in severe sepsis
- An evidence based approach to the management of early septic shock
- Evidence-based methods of fluid resuscitation in septic shock
- Which is the best vasopressor? Increasing blood pressure or improving the regional blood flow

Tutorial: Guidelines for the management of sepsis

Severe infection

- Nosocomial infection
- Severe community acquired pneumonia
- Abdominal infection
- Necrotising fasciitis
- Implantable device infection
- Meningitis
- Skin and soft tissue infection
- Prevalence of infection in hospital

Infection Therapies

- Empiric Antibiotic Therapy
- Do we need empiric therapy
- Antibiotic the right dose; which one and when to start
- Time importance in Antibiotics choice
- Antibiotics for VAP
- Using antibiotics: Which one? How much?
- Use & Misuse of antibiotics in the ICU

Nutritional support

- Enteral nutrition: Practical aspect
- How much calories
- Specific Nutrients
- Fish oil in Enteral feeding
- Enteral feeding of key micronutrients
- Protocolized care for successful Enteral nutrition
- Avoid starvation, dehydration in pre-op preparation
- Maintaining bowel movements
- Feeding the pancreatitis patient
- Should we feed into the small bowel
- Preventing muscle wasting
- Latest in TPN

Renal failure & Replacement

- Epidemiology/ Biomarkers
- Prevention
- Renal oxygenation in shock & sepsis
- The hepatorenal syndrome
- Postoperative renal failure
- Does the type of IV fluid make a difference
- Renal norepinephrine
- Antibiotic therapy during renal replacement
- Keeping the filter patent
- Role of SLED
- Is temperature control important?
- Guidelines of management
- Respiratory system mechanics
- Updates in management of obstructive airway disease.
- Managing other forms of respiratory failure
- New approaches to severe oxygenation failure-HFV
- Alveolar recruitment
- Pressure vs. Flow/ Gas exchange
- How to choose the optimal PEEP level
- Patient – ventilator interaction
- Current understanding of ventilator induced lung injury
- Management of ventilator withdrawal process
- Noninvasive ventilation
- Weaning from MV
- Can we predict the duration of MV
- Extubation delay vs. extubation failure/ Is there a standard?
- Simple weaning parameters: Do they really predict weaning success
- Cardiovascular effect of weaning
- Pulmonary secretion management
- How ventilators may mobilize secretion
- When to perform tracheostomy.
- Mechanical ventilation: Current strategies emerging concepts

Critical care in the emergency room

- Rapid delivery of reperfusion therapy
- Echocardiography as a screening tool
- Non-invasive monitoring in the emergency room
- Massive pulmonary embolism
- Use of BNP in the differential diagnosis of pulmonary edema
- Status asthmaticus in children
- Diabetic ketoacidosis in children
- Emergency management of burns
- Anaphylactic shock

Current advances in cardiology in the ICU (cardiogenic shock)

- Plasma markers
- Acute cor pulmonale
- New insights: cardiogenic shock
- Pathophysiology of Myocardial dysfunction in shock
- Recent advances in medical therapy for ACS
- Intervention approach for the treatment of ACS

Neuro-Trauma Critical Care

- Guidelines for Management of closed severe Head Injury.
- Cerebral Perfusion Pressure Management After Severe Head Injury
- Using prophylactic anticoagulant in severe head injury
- History of Neurological Treatment of Trauma
- Intracranial Pressure and Neuro-monitoring in Brain Injury
- Peculiarities of Pediatric Head Injury
- Critical care Management of odontoid fracture
- Advances in Treatment of Traumatic Brain Injury
- Intracerebral hematoma treatment Options and Controversies
- Advances in the Management of Spinal Cord Injuries
- Anticonvulsant prophylaxis after Intracerebral and subarachnoid hemorrhage
- The limits of hyperventilation

Dubai Hospi-Manage & Hospi-Design Conference Chairman's Message

CONFERENCE CHAIRMAN'S MESSAGE

"It gives me great pleasure and honour on behalf of the Department of Health & Medical Services – Government of Dubai – Biomedical and Facilities Maintenance Departments, to invite you to the Dubai International Hospital Management Conference & Exhibition – Dubai Hospi-Manage to be held in April 2007. This Conference shall improve the utilization of different expertise around the World, to share knowledge and experience in the field of Architectural Design and Biomedical equipment facilities and Hospital Management in line with the academia.

We here in Dubai are stepping forward in line with the directives of our Rulers and as stated recently by His Highness General Sheikh Mohammed Bin Rashid Al Maktoum, to make Dubai a World Hub for the best Health Care Practices, aiming to transform it into a hub of world-class health care in the region.

DOHMS is one of the leading Developers in Health Care services and the "Trauma Centre" which has been recently inaugurated is exhibiting State of Art technology in terms of Architecture, structural, Biomedical Engineering facilities and shall contribute in putting Dubai and the U.A.E. on the World Map as a Level One Trauma Centre.

May I welcome you Health Care Professionals and Architectural Designers, Hospital Managers, Biomedical and Facilities Maintenance Engineers to join us in this scientific event! "

Eng. Saeed Ali Shamsi

Chairman of Dubai Hospi Manage / Design 2007

Dubai Hospi-Manage & Hospi-Design Conference Theme

Regional Scientific Meeting for IHF

The conference shall be addressing several topics related to hospital management issues and to hospital design, facility management and biomedical. Issues like privatization of the public sector and outsourcing of health services is becoming pressing subjects that health professionals and decision makers have to tackle. Furthermore, designing hospitals nowadays need to respond to the new developments that are taking place in the medical field, our conference will shed the light on these trends. Moreover, patient safety is becoming the most important subject that hospitals need to address, thus our conference shall discuss the latest standards that shall ensure patient safety at the level of facility and technology especially with the vast developments in medical technology. The conference shall address the following main themes:

- 1) Improving Hospital Architectural/Design. Our Hospital using the State of Art Available Technology.
- 2) Preparing and Training of Biomedical and Facilities Maintenance Engineers to run Health Care Services to the most economic solutions ensuring Patient Safety.
- 3) Adopting E-Health Technology in Health Care Facilities.
- 4) Privatization of the Public Health Care Sector.
- 5) Best Practices in Managing and Processing Outsourcing Opportunities in the Health Care Environment.

International Medical Care & Diagnostic Conference & Exhibition

IMD - IHF DUBAI 2007

22 - 24 April 2007

Dubai International Convention Centre

IECM Dubai 2007 – International Emergency & Catastrophe Management Exhibition

About IECM

The Latest developments in the field of Emergency Medicine & its growth during the last decade has led to many discoveries & advances, which is why the regular gathering of the professionals at meetings such as the **International Emergency & Catastrophe Management Exhibition – IECM Dubai 2007** is crucial. The event is scheduled to take place from **22 - 24 April 2007**. The first IECM Dubai event took place in 2002 at Dubai Airport Expo, and since then it is being held consecutively every year. Following the success, IECM Dubai 2007 will be another exciting & informative event for the professionals to exchange their experience in the field of Emergency Medicine. The exhibitors who have exhibited at the previous IECM exhibitions represented Local, Regional & International market, i.e. **UAE, Saudi Arabia, Kuwait, Pakistan, Argentina, China, USA, UK, Taiwan, Germany and the rest of Europe** to list down a few. This event will encourage professionals, dealers, decision-makers and government and private sectors to get together and exchange valuable knowledge.

About IECM Dubai

IECM Dubai 2007 will take place from **22 – 24 April 2007** at **Dubai International Exhibition Centre, UAE**. Our confidence comes from the success that we have achieved during the last 5 years through the specialized IECM exhibition that facilitated in attracting exhibitors representing the distinctive areas of the Emergency Medicine. IECM exhibitions are a focal point for an industry, attracting a broad cross-section of representatives, from buyers and sellers, to trade associations and the media. Over the years the number of visitors from different parts of the world, attending the exhibition has also augmented. IECM exhibition will provide plenty of opportunities to explore new products or services in the field of Emergency Medicine.

IECM Dubai 2007 – International Emergency & Catastrophe Management Exhibition Messages

Message

It gives me immense pleasure and honor, on behalf of the Department of Health and Medical Services-DOHMS, Government of Dubai, to invite the medical professionals from both the public and private healthcare industries and all the health and safety professionals to participate in the International Emergency & Catastrophe Management Exhibition, IECM Dubai 2007, which will be held from 22-24 April 2007, at the Dubai International Exhibition Center. IECM Dubai 2007 will be held under the patronage of **H. H. Sheikh Hamdan Bin Rashid Al Maktoum**, Deputy Ruler of Dubai, Minister of finance and Industry, President of the Department of Health and Medical Services. This year IECM will be held for the 6th time consecutively since 2002. The IECM Dubai 2007 will emphasize on the new trauma centre that is going to be launched soon in Dubai. This project will meet both the emirate's current and future needs. The Department of Health and Medical Services-DOHMS, as the official government body in Dubai, caters to each and every medical demand in today's fast developing world. Together, we have compiled our vast experiences, administratively, supervisory and regulatory, in the private as well as the government sector. We have made efforts to include the services of the sophisticated scientific infrastructure on both medical as well as administrative fronts. The IECM exhibition will provide a prospective platform for the exhibitors to showcase their latest offerings in the technology. Our enthusiastic team cordially welcomes all the Healthcare Professionals and Industrialists worldwide to join us in this scientific endeavor.

Qadhi Saeed Al Murooshid

Director General
Department of Health & Medical Services,
Dubai – UAE

It gives me immense pleasure to once again invite the emerging Emergency & Catastrophe Management industry and its professionals to participate and contribute to the Dubai International Emergency & Catastrophe Management Exhibition – IECM Dubai 2007, and join us as we organize the 6th year of IECM Dubai 2007. IECM has achieved tremendous success since its commencement and depicts the significance of the "Crisis Management" among all the conferences; IECM has achieved the credit of being an enriching and interesting meeting throughout. A multifaceted exhibition gathers additional participation, from International companies and their local counter parts with each passing year. On behalf of INDEX Conferences & Exhibitions Organization Est. & International Hospital Federation (IHF), I extend a warm welcome to all, to join us in this scientific endeavor.

Abdul Salam Al Madani

President
INDEX Holding
Dubai - UAE

IECM Dubai 2007 – International Emergency & Catastrophe Management Exhibition

Exhibition

The main product line of Emergency & Catastrophe Management exhibition Consists of over 50 exhibition profiles, which provides a prospective platform for the exhibitors to showcase their latest offering in the technology.

■ Exhibitor Profile

- Ambulance Services
- Accidents and Emergency Equipment
- Rescue Equipment
- Rescue Support Materials and Services
- Emergency Medicine
- Air Ambulance
- Disaster Planning
- Aeromedical Transport
- EMS Systems
- EMS Mass Gatherings and Terrorism Prevention Devices
- HAZMATs Protection
- Pre-hospital Airway Devices
- Defibrillators
- Immobilisation Devices
- Mobile Surgical Equipment
- Paramedic Cases
- Portable Electronic Equipment
- Portable Oxygen Systems
- Spinal Boards
- Manual Resuscitators
- EEG/ECG
- Orthopedic Trauma Products
- Rapid Infusion Systems
- Trauma Wound-care Products
- Pulse/Oximetry Units
- Protective Clothing
- Stretchers
- Vehicle Extrication Equipment
- Pediatric Trauma Products
- Pre-Hospital Care
- Electrophysiology
- Cardiac Stimulation
- Imaging
- Chest Equipment
- Cardiac Equipment
- Ophthalmologic Emergency Equipment
- Intensive-care Equipments and Units
- Communication Instruments
- Means of Transportation
- First-aid Facilities and Equipments
- Mobile Diagnostic Hospitals and Complexes
- Reanimation Mobiles and Other Transport Carriers
- Paramedical Services
- Life-support Facilities
- Intensive-care Medical Equipment and Apparatus
- First-aid Drugs
- Bandages
- Law Enforcement
- Ambulance Fittings
- Fire-fighting
- Military Services
- Homeland Security Services and Equipments
- Helicopter Operations
- Search and Rescue Operations
- Emergency Respiratory Equipment
- Emergency Security Devices
- Rescue and Ambulance Attendants Uniform.
